## There's a New Thrill to Cooking in a Modern All-Gas Kitchen

### *Can You Solve This Friendly Argument In the Picture?*

Perched upon the stool, Betty is advising that the cooking be done fast. Ruth is in possession of the range, and she holds out for slow cooking. The Servel Electrolux gas refrigerator can't voice an opinion because it's always silent. We say, "Take your choice because you can cook any speed with gas — the modern kitchen fuel."

NO matter what cooking speed is called for in the recipe, gas awaits your command of a thousand cooking speeds. Modern gas ranges are almost human in the many ways they help insure best cooking results. Their beauty lends enchantment to any kitchen. Completing the kitchen ensemble is a gas refrigerator—the refrigerator that is absolutely silent because it has no moving parts to wear out and make noise. And it's the refrigerator you've heard about that operates for an average cost of less than 2 cents a day. Come in to The Gas Company to see these up-to-the-minute appliances. Ask about our budget plan that enables you to pay for them out of the savings they will make for you.
